

DesignRail® Low-Profile Top Rail (Series 450)

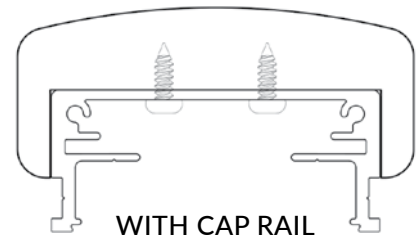

Series 450 is a low-profile top rail for DesignRail® that can be used as stand-alone or for adding your own wood or composite cap rail (not included).

FEATURES & BENEFITS

- Powder-coated aluminum
- Top rails rest on the tops of the posts, secured with stainless steel screws.
- Top rail can be ordered in 10-ft or 20-ft lengths - splice plates may be used to connect segments of top rail
- For use on level and stair railings - **requires a handrail** when used on stairs
- Can be used as standalone or with wood or composite cap rail
- Cap rail attached with screws from underneath, with optional additional construction adhesive
- Cap rail is not required to meet the required frame strength for CableRail infill
