

Feeney® End Caps

for use with CableRail Kits in wood or metal railing frames

Feeney End Caps (available in stainless steel or polyethylene) are used to cover, protect, and finish the exposed ends of the Quick-Connect® Inset fittings and Snug-Grip® Washer Nuts.

INSTALLATION

After trimming the excess cable and threads, simply snap on End Caps over the raised lip of the Quick-Connect® Inset fittings and Snug-Grip® Washer Nuts. Caps may be removed and reused.
