AAMA 2604 POWDER-COATED FINISH

10 YEAR WARRANTY

DesignRail®
Modular Aluminum Rail Kits

Engineered for **easy installation** using components that **snap and screw together**, with **pre-drilled posts and pickets** to support 6200 series 1/8" CableRail Kits for Metal posts (sold separately). All our rail and post kits feature 6000 series aluminum and AAMA-2604 powder-coated finishes for long lasting beauty and durability, and are available for 36-in and 42-in high railings. Each railing project will require specific quantities and types of kits and parts depending on the configuration of your layout.

FLEXIBLE FRAME DESIGN

- Pre-drilled Post for quicker installation
- Powder Coated Aluminum with Stainless Steel Fasteners
- Seamless, hidden Post to Rail connections, no more bulky brackets. Custom feel without the hassle
- 36″ or 42″ standard heights
- 6′ on center max. post spacing
- Available for Level or Stair applications

HORIZONTAL CABLERAIL

- 316-grade stainless steel kits include all of the attachment fittings and come in standard lengths
- Pre-fabricated 1/8″ diameter stainless steel CableRail Kits for easy cable installation
- A vertical intermediate picket is used mid-span to minimize cable deflection and is in our pre-assembled rail kits.
ColorEasy™   FRAME COLOR OPTIONS

- Durable, powder coated finishes adhere to AAMA-2604 coating specifications for superior color retention, impact resistance, and weather protection.

See Warranty and Care brochure or **scan the QR code** to learn more about our product maintenance guidelines and warranty information.

MAINTENANCE GUIDELINES

Stainless steel cables should be cleaned periodically. Cleaning frequency will depend on the environmental conditions that the product is placed in. Feeney recommends our Stainless Steel Cleaner & Protectant Kit for maintaining stainless steel products. Alternatively, warm water and mild soap can be used.

Rinse your railing frame with fresh water. Remove dust and dirt with a soft cloth or sponge and a solution of mild soap and/or liquid detergent in water. Always use a soft, damp cloth to blot dry. Avoid harsh solutions or abrasive cleaning compounds, included but not limited to: alkaline or acidic cleaners, solutions containing trisodium phosphate, phosphoric acid, hydroflouric acid, gasoline, benzene, acetone, carbon tetrachloride, certain deicing fluids, lacquer thinner or other strong solvents.

Product should be cleaned when the metal is shaded.

DesignRail® Kits
Kit Components

POST KITS

Each Post Kit includes a post with a pre-attached base plate, a post cap, and mounting screws with caps. All posts come pre-drilled for the cable fittings or for cables to pass through, and can accommodate isolation bushings when required. Stair posts are pre-drilled at an angle to accommodate a stair slope of between 29 and 34 degrees. Level Post Kits are available for railings in two heights: 36-in with 9 pre-drilled cable holes, or 42-in with 11 pre-drilled cable holes. Stair Post Kits are available for 36-in stair railings. Isolation bushings are recommend for installations in harsher climates, such as areas near salt water.

RAIL KITS

Rail Kits contain the rails that run between the posts. Each kit includes a 6-ft top and bottom rail, a pre-drilled intermediate picket, and all necessary attachment hardware. Top and bottom rails can be trimmed to exact length and stair slope in the field. Use Rail Cut Kits if cutting a single Rail Kit for use in multiple smaller sections. Rail Kits can be used with DesignRail® Post Kits or between your own wood posts.
